Abstract

This is a LaTeX template for the CHI 2010 (and beyond) Extended Abstracts. The specification requires typesetting the title in Helvetica and the body of the paper in Verdana. Since support for arbitrary OpenType fonts is not available in all LaTeX distributions (and in many, it requires extensive font format conversions), this template has only been tested in XeTeX on Mac OS X. It may or may not work with other LaTeX distributions. To use this template, you must have the Helvetica and Verdana font faces installed on your system (you probably already do.)

This template (and others) are available at manas.tungare.name/software/latex. If you'd like to contribute changes and updates, please submit them to the GitHub repository at github.com/manastungare/chi-latex. If you have any questions, drop an email to manas@tungare.name.
